

GENERAL INTRODUCTION

The following information is provided to assist licensed electricians working in the City of Guntersville. The incorporated area of the City includes services received from their utilities:

Guntersville Electric Board, Marshall-Dekalb Electrical Cooperative and North Alabama Electric Cooperative. All building contractors, electricians, and others planning new construction, altering and rewiring of existing structures should be familiar with these requirements, and the National Electrical Code (NFPA 70) (NEC). The City of Guntersville has adopted the 2005 NEC and these rules and regulations are based on the 2005 Edition.

The utilities are responsible to the service point. The utility company should be contacted to coordinate the services to the service point. Any installation not specifically addressed shall be in conformance with the NEC. Situations not covered should be taken up with the City Building Official.

In the City of Guntersville all electricians shall be licensed by the City and an electrical permit is required before any work is started. All applications for a license shall be approved by the building official.

The following sources are provided for information. All licensed electricians are expected to be familiar with the NEC.

NEC-NFPA 70 may be ordered from:
